

Donation Agreement — Project Capstone (C_001)

Project Lead:

Aidan Small
Founder (in formation), Slater Industries
South Oxfordshire, England

Project Name:

C_001 “Capstone” — Close-Range Hard-Kill Autonomous Counter-UAS Turret System

1. Purpose of Donations

By donating to Project Capstone, you acknowledge that your contribution is intended to support the early development of a working prototype of a counter-UAS system. All donated funds will be applied exclusively to:

- Purchasing the items listed in the published budget (electronics, hardware, 3D printing, power supply, tools).
- Covering essential costs of building, assembling, and programming the prototype system.
- Supporting further development steps directly related to the prototype’s testing and refinement.

2. Donor Rights and Refunds

If I (the Project Lead) fail to:

- Purchase the budgeted items, and/or
- Make a material attempt to assemble a prototype system within six (6) months of receiving your donation,

then you may request a refund of your donation. Refunds will be processed via PayPal back to the original payment method, subject to PayPal’s refund procedures and the availability of funds.

3. Accountability

I will maintain clear records of donations, purchases, and progress updates. Receipts and build documentation may be made available to donors upon request.

4. Scope of Work

This project is experimental and at an early stage. The prototype may evolve in form or function, but the intended purpose will remain in the field of: Defence technology, Counter-Unmanned Ariel System(s) / drone defence systems, Robotics and autonomous tracking turrets.

5. Donor Acknowledgement

By donating, you acknowledge that this is not a commercial purchase, investment, or pre-order. Donations are voluntary contributions to support research and prototyping.

6. Governing Law

This Agreement is governed by the laws of England & Wales.

Signed: _____
